FOREWORD

This report is one of a series of provincial reports on the results of the 1980 Census of Population and Housing conducted on May 1, 1980.

Demographic data presented herein consist of population distributions according to age, sex, marital status, highest grade completed and literacy. Other bases as gainful occupation, industry and migration are included likewise.

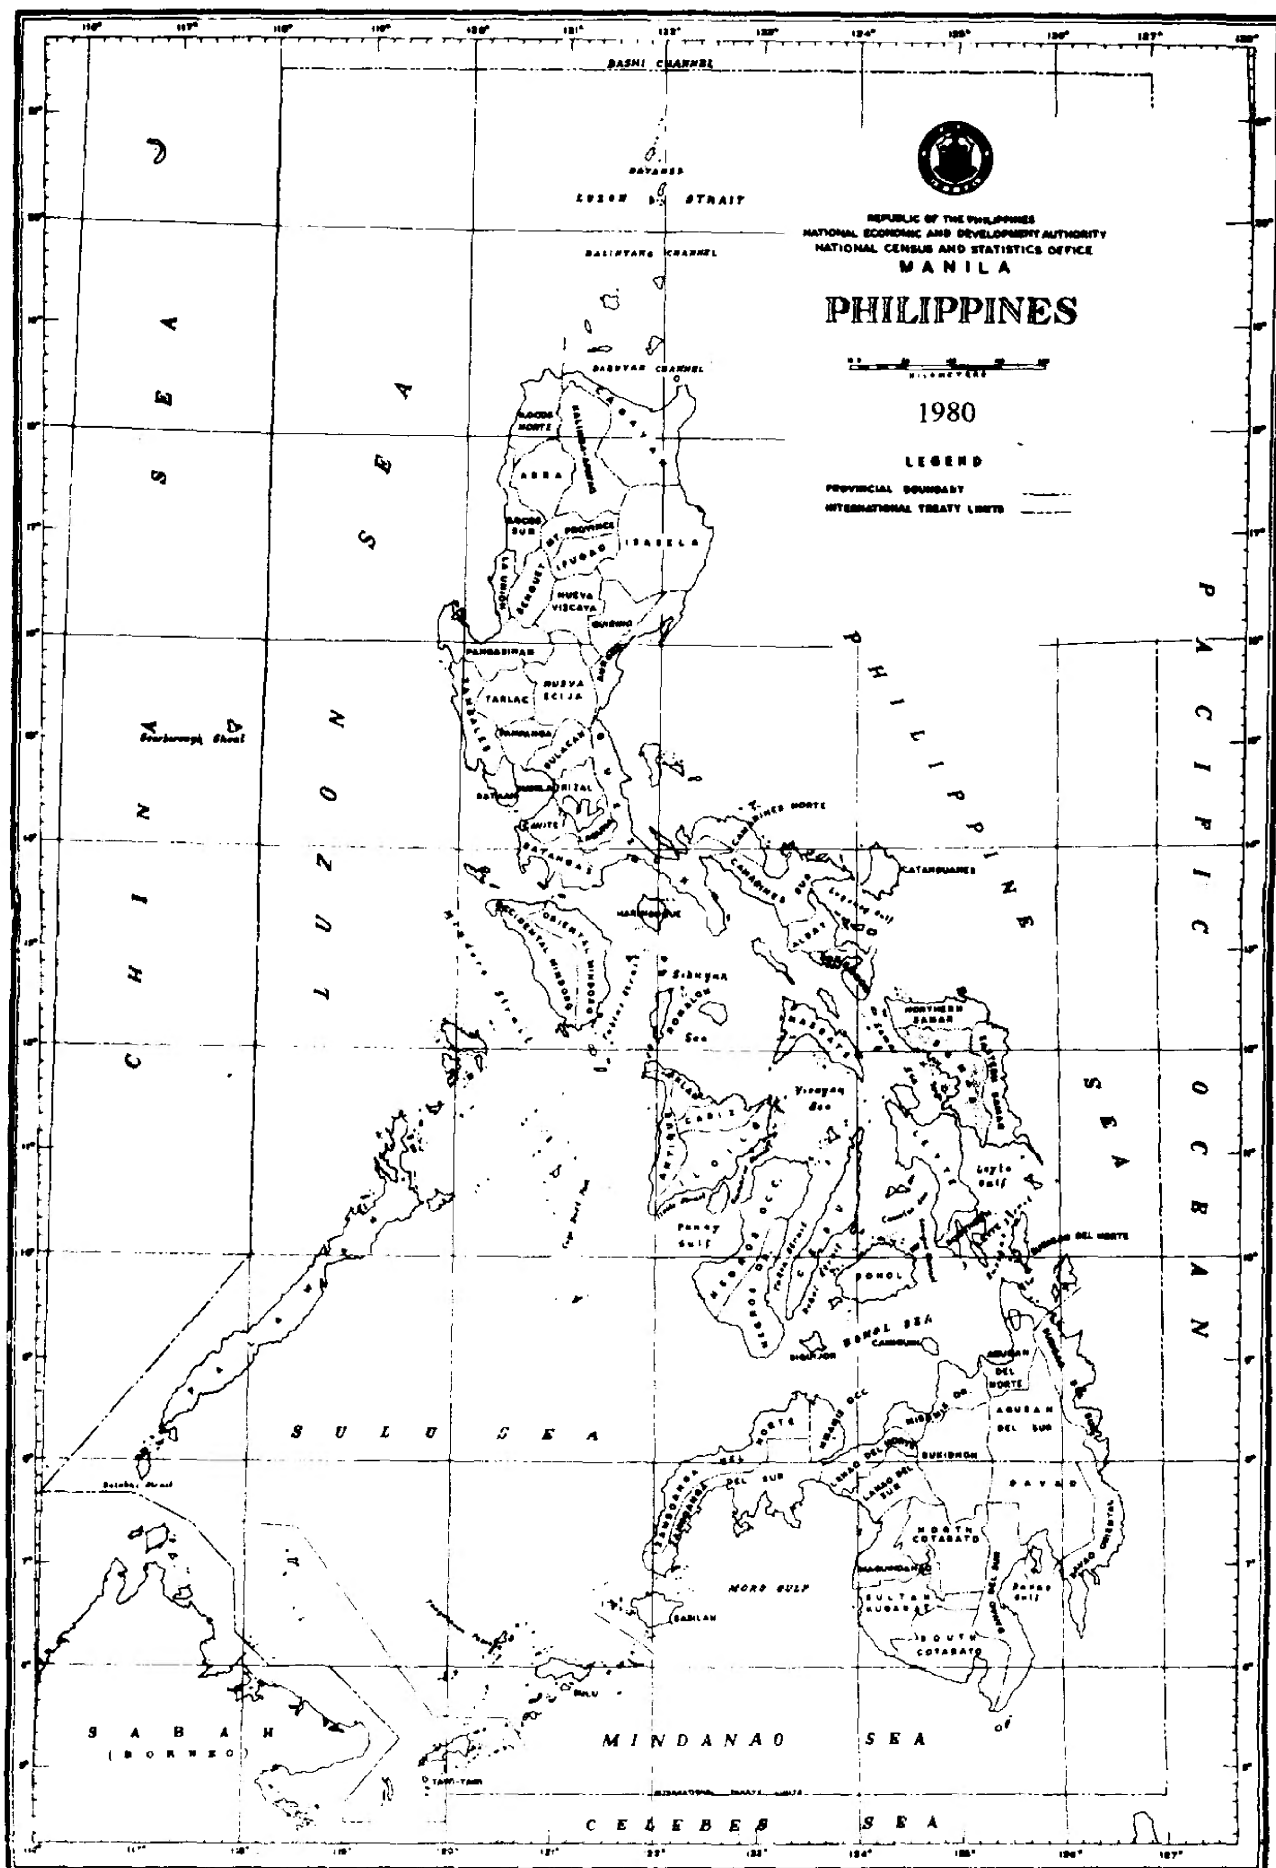

In the other aspect of the census, the following housing characteristics are considered: type of building, structural characteristics, floor area, type of tenure, use and source of water supply, lighting, type of toilet facilities, kind of cooking fuel used and appliances.

Subsequent issues will be the National Summary (Volume II) containing summary data on the final provincial reports and the Special Volume on National Capital Region (Metro Manila Area) which will cover data on the social, economic and demographic characteristics of the region.

Grateful acknowledgment is due the National Census Coordinating Board, government agencies, committees and the local coordinating boards for their invaluable assistance and cooperation.

Explanatory Text

GENERAL

INTRODUCTION

The National Census and Statistics Office conducted in May 1980, the 1980 Census of Population and Housing. This type of Census was also undertaken in May 1970. In May 1975 the Census of Population was taken as Phase I of the 1975 Integrated Census of the Population and Its Economic Activities. This nationwide undertaking was designed to obtain comprehensive data on the size, distribution, structure, change and socio-economic characteristics of the population and to take inventory of the housing accommodations, their geographic location, structural characteristics, available facilities, etc.

The population report contains data gathered from private households as well as collective households, while data on housing were collected from private households only.

It should be emphasized at this point that a complete enumeration of all households throughout the country was made but only sample household questionnaires representing 20 percent of the listed households were processed and the data published in this volume. In so doing, however, the total population count by barangay, male and female, obtained from the listing sheet taken simultaneously during the enumeration was maintained in computing the weights or expansion factors. It should also be noted that data on Tables 1 to 4 of the population tables refer to total population, that is, the population of the private households plus the collective households while Tables 5 to 10 cover exclusively the private household population.

Pursuant to the provision of Batas Pambansa Bilang 72, a final count of the population, by sex at barangay level was submitted to the President and was approved under Proclamation No. 2170 dated March 12, 1982. This report was published separately in 74 provincial volumes.

AUTHORITY FOR THE 1980 CENSUS

Under Commonwealth Act No. 591, the National Census and Statistics Office is authorized "to prepare for and undertake all censuses of population, agriculture, industry and commerce."

It may be mentioned in this regard that sometime in February 1980 Parliamentary Bill No. 809 was presented at the Batasang Pambansa, providing for the taking of an integrated census every ten years beginning 1980, with May 1 of every census year as the reference date. This bill was approved into Batas Pambansa Bilang 72 on June 11, 1980, more than one month after the start of enumeration.

INTER-AGENCY PARTICIPATION

The expertise and technical advice of the National Economic and Development Authority Inter-Agency Committee on Population and Vital Statistics and its Technical Working Group on 1980 Census of Population and Housing played a vital role in the successful undertaking of the census.

The Committee's main function was to review the questionnaire, methodologies, concept, tabulation and other related aspects of the census in the production of data and development of systems that would produce more reliable and accurate result. It had for its chairman the Dean of the University of the Philippines Population Institute (UPPI) and for its members, one representative each from the Ministries of Human Settlements (MHS), National Defense (MND), Education and Culture (MEC), Health (MOH) and Local

EXPLANATORY TEXT

Government and Community Development (MLGCD); the Commission on Population (POPCOM); National Economic and Development Authority (NEDA); and two representatives from the National Census and Statistics Office (NCSO). The Technical Working Group (TWG) for the 1980 Census of Population and Housing was headed by the Chief of the National Census and Household Surveys Department of NCSO and the members were representatives from the MHS, EPRS-NEDA, SCO-NEDA, POPCOM, UPPI, MOH, MEC, and the National Housing Authority (NHA).

Recommendations were likewise solicited from other government agencies for questions that should possibly be included in the population and housing portions in order to fill their data needs.

As early as August 1977, an NCSO Technical Committee for censuses was created. Ranking officials of the National Census and Statistics Office comprised the committee, with the Assistant Executive Director as Chairman, the Chief of the National Census and Household Surveys Department (NCHSD) as Vice-Chairman and Heads of six other departments and staff offices as members.

The committee coordinated with the Inter-Agency Committee and TWG of the NEDA on the technical aspect of the census and rendered a monthly progress report to the Executive Director. It provided the overall direction of the activities of the different subcommittees on census. The two subcommittees created, the Sub-Committee on Population and Housing Census and the Sub-Committee on Operations and Logistics Support, were directly charged with the preparatory work for the census undertaking.

CENSUS BOARDS

A systematized involvement of government agencies and instrumentalities was made possible largely through the concerted efforts of the members of the National Census Coordinating Board (NCCB) and the Provincial, City and Municipal Census Boards. The national board was created by NEDA Memorandum Order No. 4-80, dated April, 1980 and the local boards, by Memo Order No. 5-80, dated April 1, 1980, by virtue of the powers vested in the Minister of Economic Planning under Section 3 of Presidential Decree No. 1200.

The NCCB was headed by the Minister of Economic Planning as Chairman with the Executive Director as Executive Officer. Named as members were the Ministers of Agriculture, Budget, Education and Culture, Finance, Human Settlements, Public Works, Justice, Labor, Local Government and Community Development, National Defense, Natural Resources, Public Highways, Public Information and Transportation and Communication. Rules and regulations necessary for the successful undertaking of the census were issued by the Board.

At the local government level, similar functions were carried out by the Provincial City and Municipal Census Boards. The Provincial Governor headed the Provincial Census Board while the Division Superintendent of Schools was Vice-chairman. Members were the Highway District Engineer, Provincial Auditor, Provincial Commander of the Philippine Constabulary, the Provincial Development Officer and the Provincial Agriculturist. The City Census Board was composed of the City Mayor as Chairman; City Superintendent of Schools, Vice-chairman; and the City Engineer, City Assessor and City Development Officer, members. Finally, the Municipal Census Board had for its Chairman the Municipal Mayor and ably assisted by the District Supervisor as Vice-chairman. The members were the Municipal Agriculturist, Station Commander, Municipal Treasurer and the Municipal Development Officer.

EXPLANATORY TEXT

For each of these local census boards, the Provincial Census Officer, City Census Officer and the Municipal Census Officer were designated Executive Officer of their respective Board.

CENSUS ORGANIZATION

The overall direction and instructions for the census undertaking emanated from the Executive Director of the National Census and Statistics Office or in his absence, the Assistant Executive Director.

Assisted by the Task Force from the Central Office and in coordination with the local census boards, the Regional Census Officers and the Provincial Census Officers directly supervised the field operations in their respective areas. The services of District Supervisors, Head Teachers and elementary school teachers from public schools were utilized as City/Municipal Census Supervisors, Team Supervisors and Enumerators in that order.

During the field operations, the 1980 Census Operations Center under the overall supervision of the National Census and Household Surveys Department Chief, was the operating body that monitored the overall operations. Lending support to the center were the Administrative and Fiscal Services Staff.

METHOD OF ENUMERATION AND USE OF SAMPLING

The household was used as the enumeration unit and a complete listing of dwelling units, including vacant ones, was done.

A combination of complete enumeration and sampling was adopted. While all households were asked on the count of the population and housing characteristics, only twenty percent (20%) were asked on other characteristics. The selection of sample households was done systematically with a random start from a listing of households which was prepared simultaneously with the enumeration.

Using PH Form 2 (Common Private Household Questionnaire) and with an 80 percent coverage, the items asked on population were household membership, relationship to head, line number of mother, sex, date of birth, age as of last birthday and marital status. For the housing items, the type of building and the construction materials of roof and outer walls, number of rooms, floor area of the dwelling unit and the year the building was built were asked.

In addition to the population and housing items just mentioned, additional information were asked using PH Form 3 (Sample Private Household Questionnaire) from the 20 percent samples such as language or dialect generally spoken at home, citizenship, usual residence of mother at person's birth, residence of person in 1975, ability to speak Pilipino and English, school attendance, highest grade completed, literacy, economic activity of the person, place of schooling or work, fertility, nature of occupancy of the dwelling unit and housing facilities and conveniences.

Collective households were enumerated using PH Form 4, where the information asked were the same as those in PH Form 2, excluding housing items.

PLACE WHERE ENUMERATED

All persons were enumerated in their usual place of residence, which is the geographic place (street, barangay, sitio, municipality or province) where the enumerated person usually resides. As a rule, it is the place where he usually sleeps; therefore, it may be the same as or different from the place where he was found at the time of the census.

POST ENUMERATION SURVEY

Originally the plan was to conduct a Post Enumeration Survey covering the whole country. For lack of funds the survey had to be confined to Metro Manila. Its purpose was to determine the extent of underenumeration or overenumeration in the 1980 Census of Population and Housing.

A sample of 132 barangays was selected. However, in 59 barangays which were divided into two or more enumeration areas (EAs), an enumeration area was chosen as sample.

A complete listing was made of households in the sample barangays/EAs using PH Form 1-B. Twenty percent of these households were selected as sample households and interviewed using PH Form 2, which was the same questionnaire used for non-sample households during the main enumeration. The housing portion of this form was disregarded.

CONTENT AND COVERAGE OF THE PUBLICATION

In this publication, the population and households were described according to the respective items listed below:

Population Items	Housing Items
Age	Type of Building
Sex	Type of Occupancy
Marital Status	Construction Materials of Roof and Outer Walls
Highest Grade Completed	Year Built
Literacy	Floor Area of Dwelling Unit
Language/Dialect Spoken in the Household	Tenure of Owner-Occupant with Respect to the Land
Gainful and Non-Gainful Occupation	Kind of Lighting Facilities
Major and Minor Industry	Use and Source of Water Supply
Migration	Type of Toilet Facilities
	Kind of Cooking Fuel
	Household Appliances

The above items are presented in the ten population tables and nine housing tables of this report.

Except for figures on total population and sex, all other characteristics were based on a 20 percent sample.

Aside from these published tables, 10 other tables on the above characteristics plus 6 statistical tables dealing on ever-married women 15 years old and over are also available to statistical users.

DEFINITION OF TERMS AND CONCEPTS

I – POPULATION

BARANGAY

A barangay is the smallest political unit in the country and generally its enumeration is

EXPLANATORY TEXT

assigned to one enumerator. For enumeration purposes, a large barangay is usually split into parts and each part is called an enumeration area (EA).

ENUMERATION AREA

An enumeration area (EA) is a delineated area assigned to one enumerator, usually consisting of about 300 households. A barangay or part of a barangay may have been designated as an enumeration area.

URBAN AND RURAL AREAS

The same concepts used in the 1970 and the 1975 Censuses were followed in classifying areas as urban. According to these concepts, urbanized areas consist of:

1. In their entirety, all cities and municipalities having a population density of at least 1,000 persons per square kilometer.
2. Poblaciones or central districts of municipalities and cities which have a population density of at least 500 persons per square kilometer.
3. Poblaciones or central districts (not included in 1 and 2), regardless of the population size, which have the following:
 - a. Street pattern, i.e., network of streets in either parallel or right-angle orientation;
 - b. At least six establishments (commercial, manufacturing, recreational and/or personal services); and
 - c. At least three of the following:
 - 1) A town hall, church or chapel with religious services at least once a month;
 - 2) A public plaza, park or cemetery;
 - 3) A market place or building where trading activities are carried on at least once a week;
 - 4) A public building like a school, hospital, puericulture and health center or library.
4. Barangays having at least 1,000 inhabitants which meet the conditions set forth in 3 above, and where the occupation of the inhabitants is predominantly non-farming or fishing.

All areas not falling under any of the above classifications are considered rural.

PERSONS ENUMERATED IN A PRIVATE HOUSEHOLD

The following were counted and enumerated as members of the household:

1. Persons whose usual place of residence is the place where the household lives and present at the time of visit of the enumerator, except those born after 12:01 A.M., May 1, 1980;
2. Persons whose usual residence is the place where the enumerated household lives, but temporarily away at the time of enumeration, such as:
 - a. persons temporarily away on vacation, business or pleasure trip or any other purpose in the Philippines who are expected to be back within six months,

EXPLANATORY TEXT

- or within one year, if abroad;
 - b. students who usually go home to their respective households at least once a week;
 - c. persons working elsewhere who usually go home to their respective households at least once a week;
 - d. patients confined in hospitals for not more than six months at the time of enumeration of the household, except those confined (1) as inmates (not patients in wards for temporary confinement) in tuberculosis pavilions; (2) in mental hospitals; (3) in leprosaria or leper colonies; and (4) in rehabilitation centers for drug addicts;
 - e. trainees in the Armed Forces of the Philippines, if their training is not more than six months;
 - f. convicts and detainees in provincial or municipal/city jails or military camps, who have been confined for not more than 6 months at the time of enumeration of the household, except those who have been sentenced for more than 6 months (including those whose sentence is on appeal), even though just confined; and
 - g. officers and crew members of coastal, interisland, or fishing vessels; officers and crew members of ocean-going vessels who usually go home to their household at least once a year.
3. Boarders of the household who are working, looking for work or studying, and who do not go home at least once a week;
 4. Employees of household-operated enterprises who eat and sleep with the household and who do not go home at least once a week;
 5. Persons (other than those in "3" and "4") whose usual place of residence is elsewhere, but who have been away from their usual place of residence for more than 6 months;
 6. Members of the Armed Forces of the Philippines including draftees, sleeping most of the nights with the household, except those who only board or lodge with the household and who usually go home at least once a week; in such a case, they will be enumerated in their own household;
 7. Persons found in the household who have no usual place of residence elsewhere;
 8. Persons found in the household who are not certain of being enumerated elsewhere;
 9. Persons who consider the dwelling unit of the household as their usual place of residence but are living within the premises of a foreign embassy, ministry, legation or consulate, including non-Filipino employees who have been residents of the Philippines before such employment;
 10. Citizens of foreign countries and Filipinos (balikbayan) who have resided or expect to reside in the Philippines for more than one year from arrival;
 11. Persons who sleep in the same dwelling unit but may not be able to take all or some of their meals with the household because of the nature of their work or other similar reason (they take their meals at place of work, etc.), should be considered as part of the household; and
 12. A household member who is alive as of 12:01 A.M., May 1, 1980, but dies prior to the enumeration of the household.

EXPLANATORY TEXT

PERSONS TOTALLY EXCLUDED FROM THE ENUMERATION

Totally excluded from the population count of the Philippines were:

1. Foreign ambassadors, ministers, consuls or other diplomatic representatives, and members of their households (except Filipino employees and non-Filipino employees who had been residents of the Philippines prior to said employment);
2. Citizens of foreign countries living within the premises of an embassy, legation, chancellory or consulate;
3. Officers and enlisted men of U.S. Military or Naval Forces and non-Filipino members of their households, irrespective of residence; foreigners who are civilian employees in U.S. military or naval stations and member of their families living within the premises of said stations or reservation; (Note: for foreigners who are civilian employees of said stations living outside the station or reservation, see Item 5).
4. Citizens of foreign countries who are Chiefs and officials of international organizations like UN, ILO or USAID, who are subject to reassignment to other countries after their tour of duty in the Philippines, and members of their families;
5. Citizens of foreign countries together with non-Filipino members of their families, who are students or who are employed, or have business in the Philippines and have been in the Philippines or expect to stay in the country for one year or less from arrival;
6. Citizens of foreign countries and Filipinos with usual place of residence in a foreign country, who are visiting in the Philippines and expect to stay in the country for one year or less from arrival (e.g. a *balikbayan* who will return to his usual place of residence abroad after a short vacation or visit in the Philippines);
7. Citizens of foreign countries in refugee camps/vessels; and
8. Residents of the Philippines on vacation, pleasure or business trip, etc. abroad, who have been away or expected to be away from the Philippines for more than one year from departure.

USUAL PLACE OF RESIDENCE

The term refers to the geographic place (street, sitio, barrio/barangay, municipality or province) where the enumerated person usually resides. As a rule, it is the place where he sleeps most of the time; hence, it may be the same as or different from the place where he was found at the time of the census.

HOUSEHOLD

A household usually consists of a group of persons who sleep in the same dwelling unit and have common arrangements for the preparation and consumption of food. A person who lives alone is considered as one separate household. Although in most cases a household consists of a related family group, some household members may have no relationship to the central group. Boarders and servants, for instance are counted as part of a particular household if they take their meals with the household and sleep in the same dwelling unit. Persons who sleep with a household but individually cook their meals or eat elsewhere are each considered as single-person household.

EXPLANATORY TEXT

Three generations may be living in one dwelling unit. If they are divided into two or more groups whose eating arrangements are independent from each other, each group is counted as a separate household.

PERSONS NOT LIVING IN HOUSEHOLD

Falling under this category are persons living in collective living quarters such as welfare institutions (orphanages and homes for the aged or infirm); penal and corrective institutions (jails, national penitentiary, and reformatory institutions); hospitals, sanatoria, leprosaria, and nurses homes; dormitories and boarding schools; lodging houses such as hotels, tourist homes and the like; military camps and others.

Most of these institutions house inmates for whom care or custody is provided by resident staff members, or persons residing in group quarters or in housing units on the institutional grounds.

Private families living within such institutions, however, are excluded from the classification, as well as persons (employees, students, etc.) who go home to their families on weekends or days off. Persons found in lodging houses, but who are on vacation or business trips and whose absence from home does not exceed six months on the day of enumeration, are likewise not counted as part of the institutional population.

RESPONDENT

A respondent is any responsible adult member of the household who furnished the information or answers to questions during the interview.

LANGUAGE/DIALECT GENERALLY SPOKEN IN THE HOUSEHOLD

This refers to the language or dialect spoken most of the time by members of the household. In cases where two or more languages/dialects are spoken by household members, the one most often used in conversations among members of the family of the head when most of them are gathered together is considered as the language/dialect generally spoken in the household.

HEAD OF HOUSEHOLD

The person responsible for the care and organization of the household is generally considered as the head of the household. He usually provides the chief source of income for the household.

In the case of a household consisting of two or more unrelated persons sharing a dwelling unit and sharing the same cooking facilities and meals, the head is usually the eldest male or female in the group regarded as such by the other members.

RELATIONSHIP TO HEAD OF HOUSEHOLD

This determines how each household member is related to the head, who is usually the husband or father, although in his absence or if incapacitated, the wife may be designated as head.

1. Spouse — a woman/man married to and living with the head. This includes legal marriages as well as common-law relationships.
2. Son/daughter — the head's own child, stepchild, or adopted child.

EXPLANATORY TEXT

3. Son-in-law/daughter-in-law — refers to a household member related to the head by marriage to his daughter or son.
4. Grandson/granddaughter — child of the son or daughter of the head.
5. Other relative — a household member related to the head by blood, marriage, or adoption. Father, mother, aunts, nephews, parents-in-law and cousins are examples.
6. Others — any person in the household who is usually a non-relative of the head. Boarders and servants fall under this category. Certain members of the household who are related to the head by blood or affinity, but are actually boarders or servants in the household, are classified under "Others".

For collective households and group quarters, the question on relationship refers to the person's relationship to the institution or establishment, and not to the person recorded as head.

AGE AND DATE OF BIRTH

Data on the age of the population were obtained by asking the respondent the month and year of birth and the age itself of the household member before May 1, 1980. To ensure accuracy, a conversion table on age before May 1, 1980 was prepared for the use of enumerators, editors/coders and verifiers.

MARITAL STATUS

This refers to the civil status of all persons 10 years old and over. A person in this age group is classified as single, married, widowed, separated or divorced, or civil status unknown, based on the following definitions:

- a. Single — If never been married.
- b. Married — Legally married or living consensually with husband/wife without benefit of a legal marriage. A person classified as "married" includes one who remarried after having been widowed, separated or divorced or one temporarily separated from spouse owing to the nature of work, illness or service in the Armed Forces.
- c. Widowed — A person whose spouse died and who has not remarried at the time of enumeration.
- d. Separated — If permanently separated from spouse either legally or otherwise, due to marital discord.
- e. Divorced — If bond of matrimony has been dissolved through a court decree and is therefore free to remarry.
- f. Unknown — If civil or marital status is either not known to the respondent, or the respondent himself refuses to reveal the marital status of such person.

CITIZENSHIP

Citizenship is defined as the legal nationality of a person. A citizen is a legal national of the country of the census; an alien is a non-national of the country.

LITERACY

A person is considered literate if he is able to read and write a simple message in any language or dialect.

EXPLANATORY TEXT

HIGHEST GRADE COMPLETED

This has reference to the specific grade or year completed in elementary school, high school, college or university, by persons 7 years of age and over. Academic degree holders are classified according to the title of the degree received or the major field of study undertaken.

USUAL OCCUPATION

This refers to the specific job or kind of work that a person, who works most of the year, is usually pursuing, or if unemployed at the time of enumeration, it is the kind of work he used to do most of the year. A person is considered as usually working most of the year if he works for at least 10 hours a week for 26 weeks either for pay in cash or in kind, for a fee or profit in own farm, business or establishment or practice of a profession and without pay on family farm or enterprise. This particular group of workers is referred to as gainful workers.

For persons who do not work most of the year, the usual occupation relates to the non-gainful activities they usually do most of the year. Among such persons are housekeepers, students, pensioners, retired and disabled. However, a person who is housekeeping or schooling and also works in a gainful activity was reported as gainfully employed, even if more time was spent housekeeping or studying, as the case may be.

INDUSTRY

Industry refers to the specific character and nature of business or industry or the place where the work is being performed in connection with the job or occupation reported for a person.

EVER-MARRIED WOMAN

This refers to a woman who has already entered married life. Marriage here may either be legal or consensual union. At the time of enumeration the ever-married woman may still be married, or already widowed, separated or divorced.

II – HOUSING

BUILDING

A building is any independent free-standing structure comprising one or more rooms or other spaces, covered by a roof and enclosed within external walls or dividing walls with adjacent building which usually extend from the foundation to the roof. It usually contains one or more rooms internally connected with one another. A building therefore, is any structure intended for dwelling, storage, factory, shelter or for some other useful purposes.

For purposes of the 1980 Census of Population and Housing, only the following buildings were listed and assigned building serial numbers:

- a. A house or any kind of building or shelter where people were actually living;
- b. A residential building (house, apartment or accessoria, condominium) that was vacant;

EXPLANATORY TEXT

- c. Hotel, motel, lodging house, dormitory or camp (construction, logging, mining, etc.) in operation;
- d. A commercial, office, industrial, agricultural or other kinds of buildings with one or more dwelling units (containing a kitchen/kitchen-dining room, living room and a bedroom, and with separate entrance) which were all vacant.

The different types of buildings are:

1. **Single house** – a complete structure intended for one household. It includes the so-called “nipa hut” or a small house that is built as a more or less permanent dwelling unit.
2. **Duplex** – a structure intended for two households, with complete living facilities for each. It is divided either vertically or horizontally into two separate dwelling units which are usually identical.
3. **Apartment/accesoria/condominium/row house**

An apartment is a structure usually of several stories, made up of three or more independent entrances from internal halls or courts. It differs from an accesoria in that an apartment has one common entrance from the outside.

An accesoria is usually a one or two-floor structure divided into three or more dwelling units, each dwelling unit having its own separate entrance from the outside. Another name for accesoria is row house.

A condominium is usually a high-rise building where the dwelling units are owned individually but the land and other areas and facilities are owned in common.

4. **Improvised (barong-barong)** – a makeshift or roughly constructed house usually built with salvaged materials.
5. **Commercial/industrial/agricultural** – buildings not intended for human habitation but used as dwelling units at the time of the census.

Commercial – a building used for transacting business or rendering professional services, such as a storage or an office building.

Industrial – a building used for processing, assembling, fabricating, finishing, manufacturing or packaging operations, such as a factory or a plant.

Agricultural – any structure used for agricultural purposes, such as a barn, warehouse, rice mill, etc.

6. **Other housing unit (natural shelter, boat, etc.)**

This refers to living quarters which are not intended for human habitation nor located in permanent buildings but which are, nevertheless, used as living quarters at the time of the census. Caves, other natural shelters and mobile housing units such as trailer, barge, boat, etc., fall within this category.

7. **Hotel, lodging house, dormitory, etc.** – This group comprises permanent structures which provide lodging and/or meals on fee basis. Hotels, motels, inns, boarding houses, dormitories, pensions and lodging houses fall within this category.
8. **Institutional (hospital/convent/school dormitory/penal institution, etc.)** – a building intended for persons confined to receive medical, charitable, or other care treatment such as jails and penal colonies, and other buildings like convents, school dormitories, etc.
9. **Other collective living quarters** – any structure or shelter which does not fall under items 7 and 8. Included in this category are camps which are defined sets of

EXPLANATORY TEXT

premises originally intended for the temporary accommodation of persons with common activities or interests like military camps, and other camps established for the housing of workers in mining, agriculture, public works or other types of enterprises.

DWELLING UNIT

A dwelling unit is a separate and independent place of abode intended for habitation by one household, or one not intended for habitation but occupied as living quarters by a household at the time of the census.

Dwelling units counted included those that are occupied and those that are unoccupied.

CONSTRUCTION MATERIALS OF ROOF

The kinds of materials used are as follows:

1. Galvanized iron/aluminum
2. Tile/concrete/brick/stone
3. Asbestos
4. Cogon/nipa
5. Makeshift/salvaged materials
6. Others (anahaw, etc.)

CONSTRUCTION MATERIALS OF OUTER WALLS

The kinds of materials may be any of the following:

1. Galvanized iron/aluminum
2. Tile/concrete/brick/stone
3. Wood/plywood
4. Mixed tile/concrete/brick/stone and wood/plywood
5. Asbestos
6. Bamboo/sawali
7. Cogon/nipa
8. Makeshift/salvaged materials
9. Others (anahaw, etc.)

If the roof or outer walls are constructed of two or more materials the material most used was reported.

YEAR BUILDING WAS BUILT

This refers to the year when the extent of construction permitted occupancy for living purposes. The year reported was the particular year when the occupancy started or when the building was fit for occupancy even if not occupied.

NUMBER OF ROOMS IN THE DWELLING UNIT

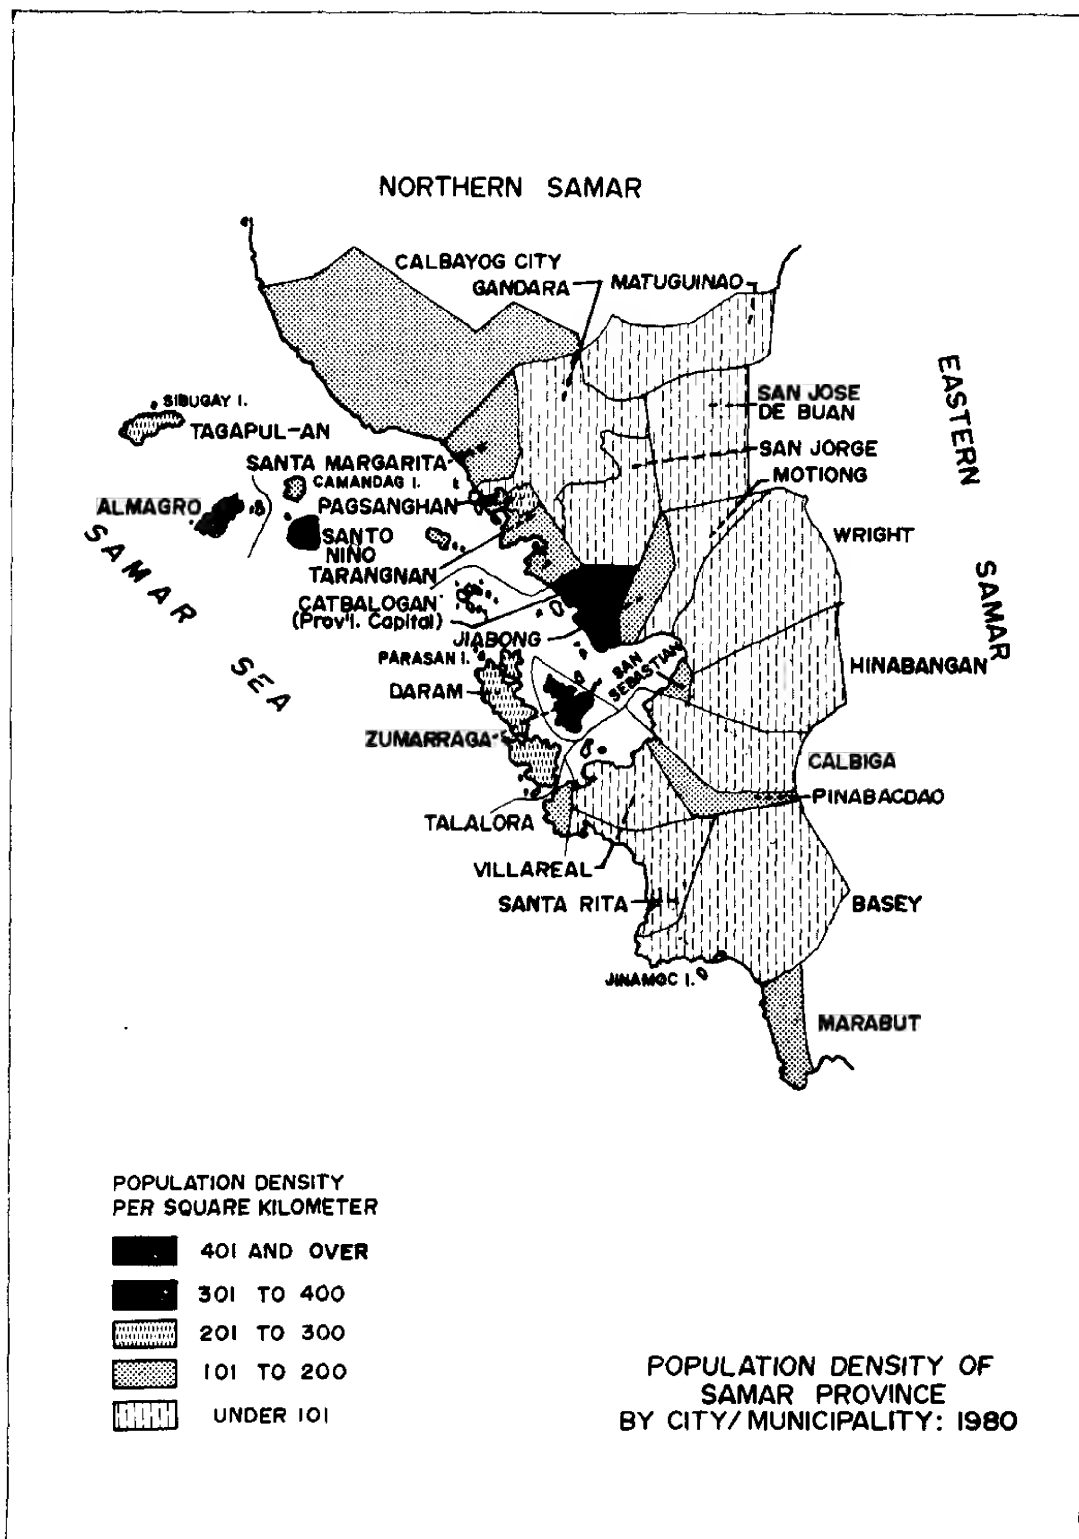

A room is defined as a space in a dwelling unit or other living quarters enclosed by walls reaching from the floor to the ceiling or roof covering, or at least to a height of 1.8 meters which are of permanent or semi-permanent structure, of a size large enough to hold a bed for an adult or at least has an area of 3 square meters.

EXPLANATORY TEXT

The total number of rooms reported included the bedrooms, dining room, living room, kitchen, roofed veranda, library or music room and other separate spaces used or intended for dwelling purposes, as long as they meet the criteria of walls and floor space. Passageways, lobbies, bathrooms and toilets or rooms used exclusively as store/shop/clinic/grains storage (nobody sleeps therein) were not counted as rooms even if they meet the criteria.

FLOOR AREA OF DWELLING UNIT

This refers to the space enclosed by the exterior walls of the dwelling unit, or the space measured inside the outer walls of the spaces that are counted as rooms. In case of several floors, the area of each floor in square meters was taken and added together to get the total floor area of the dwelling unit. Areas of floor spaces that are not considered rooms such as bathroom, toilet, storeroom, passageway were excluded in determining the floor area.

Samar: A Brief Analysis

Samar Island, the third largest island in the Philippine Archipelago, is situated southeast of Luzon and occupying the northernmost section of the Eastern Visayas Region. Its boundaries are the San Bernardino Strait on the north, the Samar Sea and San Juanico Strait on the west and the Leyte Gulf on the south. Samar Province once comprised the whole island of Samar. Today, however, the island consists of three administrative provinces created under Republic Act No. 4221 dated June 19, 1965. The western portion, named Western Samar, was renamed Samar on June 21, 1969 by virtue of Republic Act No. 5650.

The province is bounded by Eastern Samar on the east, Northern Samar on the north, Samar Sea on the west and Leyte Gulf and partly by San Pedro Bay on the south. The San Juanico Strait separates Samar from Leyte on the southwest. Samar has a land area of 5,591.0 square kilometers, representing 1.86 percent of the total land area of the country.

The topographic composition of Samar consists mostly of low rugged hills and small lowland areas particularly found in Calbayog and in the valley of the Gandara River. Due to its rugged interior, most of its 25 municipalities and 1 city are located near the coast. Basey, Gandara and Sta. Rita are the leading rice-producing areas of Samar while Catbalogan, the provincial capital, is an important seaport lying along Malquered Bay.

POPULATION

As of May 1, 1980, the population recorded for Samar was 501,439 (males – 257,121; females – 244,318). The total population indicated an increase of 23,061 or 4.82 percent within a span of five years. The population figure put the annual geometric growth rate at 0.95 percent, showing a downward trend of the growth rate registered between 1960 and 1970 (1.79%). Corresponding to the increase in total population, its density went up from 85.6 in 1975 to 89.7 in 1980 or an increase of 4.1 persons per square kilometer.

The province is still predominantly rural, although the proportion of the urban population increased from 10.74 percent in 1975 to 14.55 percent in 1980. Consequently, a significant decrease of 3.81 percentage points is noted in the proportion of its rural population, from 89.26 percent to 85.45 percent over a span of five years.

Table A shows the urban-rural population by sex for three censal years.

A BRIEF ANALYSIS

The sex ratio of the province (number of males per 100 females) dropped slightly from 105.73 to 105.24. As in 1975, the urban population was dominated by the females (96.72 in 1975 and 98.82 in 1980). In the rural areas, however, the males outnumbered the females (106.87 in 1975; 106.38 in 1980).

Figure 1 presents the distribution of the population by five-year age groups. The graph shows the population forming a pyramid-like structure with persons below five years old as the base, which gradually declines as the group grows older, and those eighty and above as the apex. However, deviations from the usual pyramid configuration were noted in both urban and rural population. For the urban male and female population, the 10-14 age group outnumber the age group 5-9 years, while urban females aged 60-64 exceed the age group 50-59 years and urban males 30-34 years old are outnumbered by those 35-39 years old. In the rural areas, males and females 35-39 years old outnumber the age group 30-34 years old.

AGE COMPOSITION

Persons belonging to the younger age bracket (0-14 years) slightly decreased from 47.87 percent in 1970 to 47.35 percent in 1975 and decreased further to 45.72 percent in 1980. The productive age group (15-64 years), however, exhibited an increasing pattern having 49.02 percent in 1970, 49.45 percent in 1975, and 50.56 percent in 1980. Garnering 3.72 percent in 1980, the older age group (65 years and over) increased by 0.52 and 0.61 percentage points over the 1975 and 1970 proportions, respectively.

Shown below is the broad age distribution of the population for 1970, 1975 and 1980:

**TABLE B — AGE COMPOSITION OF THE POPULATION,
SAMAR : 1970, 1975 AND 1980**

Age Composition	1980		1975		1970	
	Number	Percent	Number	Percent	Number	Percent

65 years and over	18,637	3.72	15,326	3.20	13,727	3.11

The proportion of the youth population in the urban areas is lower than in the rural areas. However, higher percentages of the productive age and the older age groups are found in the former than in the latter areas. Of the total urban population, 42.48 percent are 0-14 years old; 52.75 percent, 15-64 years and 4.77 percent, 65 years and over. On the other hand, 46.27 percent of the rural population belong to the younger age bracket; 50.19 percent, to the productive ages and 3.54 percent, to the older age group.

A large number of persons in the productive age group resulted to a low dependency ratio (97.77). The dependency ratio in urban areas (89.58) was lower than that in the rural areas (99.23).

A BRIEF ANALYSIS

The population is slightly getting older as shown by the increasing median age of Samar. From 15 years in 1975 it went up to 16 years in 1980, gaining one year within a five year period.

MARITAL STATUS

Married persons (54.12%) registered the biggest proportion over all the other marital status categories. The never married comprised 41.01 percent; the widowed, 4.04 percent; the divorced or separated, 0.74 percent and those who did not reveal their marital status, 0.09 percent.

While the proportion of married persons followed an increasing trend, the reverse was displayed by the never married group. From 52.23 percent in 1970, married persons increased to 53.30 percent in 1975 and finally to 54.12 percent in 1980. On the other hand, single persons decreased from 43.19 percent in 1970 to 42.76 percent in 1975 and down to 41.01 percent in 1980.

More females (55.61%) than males (52.70%) were married. The same was true for the widowed (females – 5.61%; males – 2.55%) and the divorced or separated (females – 0.84%; males – 0.65%). On the other hand, more males (44.01%) than females (37.84%) tended to remain single.

A BRIEF ANALYSIS

HIGHEST GRADE COMPLETED

Despite a 2.60 percentage point decrease over the 1975 proportion, elementary schoolers retain its lead of 66.88 percent. Persons who reached the secondary (12.90%) and college levels (3.55%) increased by 2.19 and 1.12 percentage points, respectively. Academic degree holders, likewise, gained 0.50 percentage point from 1.69 percent in 1975. On the other hand, persons with no formal education slid down from 14.95 percent in 1975 to 13.99 percent in 1980. Similarly, those with unknown educational status dropped by 0.25 percentage point.

Almost forty percent (39.35%) in the elementary level went as far as the first to third grade; 21.62 percent finished fourth grade; 13.81 percent, fifth grade and 25.22 percent attained sixth and seventh grade. About 75.29 percent of those who reached the secondary level completed only the lower years, while 24.71 percent went through the fourth year. Of the college undergraduates, 81.42 percent finished first to third year; the other 18.58 percent reached fourth or higher years.

Table D gives the distribution of the private household population 7 years old and over by highest grade completed in 1975 and 1980.

A BRIEF ANALYSIS

LITERACY

The literacy rate for the private household population 10 years old and over stood at 72.19 percent. Because of the availability of more schools, literacy rate was higher in urban (88.18%) than in rural areas (69.32%).

The females exceeded the males in literacy rate (74.49%, females; 69.99%, males). In the urban areas, there are 89.21 percent female literates compared to 87.10 percent of their partners. Among the rural females, a total of 71.68 percent were literates, higher than the rural males' 67.12 percent.

LANGUAGE OR DIALECT

Fourteen languages and dialects are reported spoken in the 26 municipalities of the province, with Lineyte-Samaron (Waray) as the major dialect. In three municipalities – San Jose de Buan, San Sebastian and Pagsanghan – no other dialect is used except Lineyte-Samar-

A BRIEF ANALYSIS

non (Waray). Almost ninety percent (89.94%) of the private households in the province speak Lineyte-Samarnon (Waray). Around 9.02 percent use Cebuano; 0.36 percent, Tagalog; 0.31 percent, Bicol and 0.12 percent, Davaweño.

GAINFUL OCCUPATION

Of the private household population 15 years old and over, 147,916 or 54.53 percent are engaged in gainful work. Although the 1980 proportion (73.89%) is 2.16 percentage points lower than in 1975, agricultural, animal husbandry and forestry workers, fishermen and hunters top the list over all the other gainful occupation groups. Second in rank are the production and related workers, transport equipment operators and laborers which constitute 10.63 percent. Maintaining its third post since 1975 are the service workers, registering 4.67 percent. Professional, technical and related workers likewise make up 4.12 percent, an increase of 0.47 percentage point over the 1975 proportion. On the other hand, sales workers dropped from 4.18 percent in 1975 to 3.56 percent in 1980. Clerical and related workers increased to 1.69 percent from 1.26 percent in 1975 while administrative, executive and managerial workers went down to 0.16 percent from 0.35 percent. Workers not classifiable by occupation make up 1.28 percent.

The following table shows the composition of the working population 15 years old and over by major gainful occupation in 1975 and 1980.

A BRIEF ANALYSIS

INDUSTRY

Of all the major industry groups, agriculture, fishery and forestry absorb 74.87 percent of the gainful workers. Almost eighty percent (79.60%) of the agricultural workers derive their income from agricultural crop production; 18.74 percent, fishery; 1.13 percent, forestry; 0.32 percent, agricultural services; 0.16 percent, production of livestock, poultry and other animals and 0.05 percent, hunting, trapping and game propagation. Trailing far behind is the community, social and personal services which comprise 10.05 percent of the workers. This industry group consists of three main sources of employment: personal and household services (41.74%), education services (31.32%) and public administration and defense (15.29%). About 4.97 percent are engaged in manufacturing and 3.59 percent in wholesale and retail trade. Transportation, storage and communication employ 2.47 percent; construction, 1.58 percent; financing, insurance, real estate and business services, 0.84 percent; mining and quarrying, 0.28 percent and electricity, gas and water, 0.19 percent. Workers in activities not adequately defined constitute 1.16 percent.

A BRIEF ANALYSIS

MIGRATION

A slight movement of the private household population 5 years old and over is noted in Samar during the past five years: 96.18 percent resided in the same city or municipality where they had lived on May 1, 1975. Those who changed residence between 1975 and 1980 mostly moved from another city/municipality within the province (2.29%), followed by those coming from another province (1.32%) and farther behind were residents of foreign countries (0.21%). Majority of the population migrated to rural areas.

TYPE OF BUILDING

Almost all (96.84%) of the 91,939 households in the province are occupying single houses. The rest (3.16%) are either living in duplex (1.40%), apartment/accesoria/condominium/row house (0.68%), improvised/(barong-barong) (0.86%), commercial/industrial agricultural (0.15%), and in other types of structures (0.07%).

Majority (87.06%) of the households living in single houses are located in the rural areas; only 12.94 percent are in the urban areas. A higher proportion of households residing

A BRIEF ANALYSIS

in duplex is found in the rural areas (58.33%) than in the urban areas (41.67%). The number of households living in apartment/accesoria/condominium/row house is, likewise, much higher in the rural areas (63.02%) than in the urban areas (36.98%). Moreover, about 83.16 percent of the occupants of improvised structures are found in the rural areas, with only 16.84 percent in the urban areas. Seventy percent of the households occupying other housing units such as natural shelter, boat, etc. are in the rural areas, whereas 30.00 percent are in the urban areas. In addition, households occupying other collective living quarters such as military camps are entirely located in the rural areas.

On the other hand, a greater proportion of the commercial/industrial/agricultural building occupants are in the urban areas (89.13%), with only 10.87 percent in the rural areas. Similarly, more urban households are occupants of hotel, lodging house, dormitory, etc. (75.00%) and institutional buildings such as hospital, convent, school dormitory, etc. (62.50%).

TYPE OF OCCUPANCY

About 90.23 percent of the households own the dwelling units they occupy. Those in the tenant-lessee category make up 4.26 percent. Only 5.31 percent of the households enjoy the rent-free type of occupancy and a slight 0.20 percent are subtenants/sublessees.

A BRIEF ANALYSIS

CONSTRUCTION MATERIALS OF ROOF AND OUTER WALLS

Dwelling units of almost eighty percent (79.92%) of the households in Samar have roofs of light materials (cogon/nipa, makeshift/salvaged materials, and others such as anahaw) against 20.08 percent with strong materials (galvanized iron, tile/concrete/brick/stone and asbestos). Of the total urban households, 63.20 percent have their dwelling units built with roofs of light materials, with only 36.80 percent, of strong materials. More rural households, likewise, have units roofed with light materials (82.57%) than strong materials (17.43%).

Walls built with light materials (bamboo/sawali, cogon/nipa, makeshift/salvaged materials, other) are used by 61.00 percent of the households while 39.00 percent of the dwelling units are constructed with walls of strong materials (galvanized iron/aluminum, tile/concrete/brick/stone, wood/plywood, mixed tile/concrete/brick/stone and wood/plywood, asbestos). In urban areas, dwelling units with walls of strong materials comprise 57.50 percent while those with walls of light materials, 42.50 percent. On the other hand, dwelling units of 63.93 percent of the rural households have walls of light materials; only 36.07 percent are of strong materials.

YEAR BUILT

Nearly half (49.04%) of the households occupy dwelling units built between 1976-1980, followed by those in units erected in 1971-1975 (20.61%), 1961-1970 (17.26%), 1951-1960 (8.47%) and 1942-1950 (2.72%). Very few households (1.90%) are occupying units built before World War II.

FLOOR AREA OF DWELLING UNIT

Table 3 shows that about 60.96 percent of the total households in Samar occupy dwelling units with floor area less than 30 square meters. Twenty-seven percent live in units of 30-49 square meters; 6.15 percent, 50-69 square meters and 2.84 percent, 70-99 square meters. Only 3.05 percent of the households enjoy living in units of 100 square meters and over.

TENURE OF OWNER-OCCUPANT WITH RESPECT TO THE LAND

Of the total households who own their dwelling units, 61.36 percent also own the land where the structure is erected. About 15.65 percent are lessees or sublessees; 5.15 percent are farm lessees/agricultural tenants of landowner; 3.27 percent, other legal tenure and 14.57 percent, no tenure (squatter, etc.).

SOURCE AND USE OF WATER SUPPLY

Census results reveal that faucet, community water system is the most used source of water for drinking purposes (34.96%), while for kitchen use and for washing clothes, the households depend mostly on dug well (33.58% and 30.08%, respectively). For drinking purposes, others prefer water from dug well (27.25%), spring (19.10%), tubed/piped deep well (13.49%), tubed/piped shallow well (2.71%) and lake, river, stream, etc. (2.11%). Barely 0.38 percent of the households utilize rain water for drinking. For kitchen use, 29.97 percent depend on faucet, community water system; 15.33 percent, spring; 11.14 percent, tubed/piped deep well; 6.54 percent, lake, river, stream, etc. 3.19 percent, tubed/piped shallow well and 0.25 percent, rain. For washing clothes, a sizeable portion (25.18%) utilize water from lake, river, stream, etc., while the rest use faucet, community water system (22.75%), spring (12.21%), tubed/piped deep well (7.13%), tubed/piped shallow well (2.48%), and only 0.17 percent, from rain.

A BRIEF ANALYSIS

KIND OF LIGHTING FACILITIES

Most (81.77%) households in Samar still depend on kerosene for their lighting facility. More than one-tenth (11.24%) use electricity and 6.32 percent, liquefied petroleum gas. A very small percentage of the households use oil (0.44%) and other (0.23%). Both urban (60.28%) and rural (85.17%) households have a high percentage of kerosene users. However, the proportion of consumers of electricity is much higher in the urban areas (37.63%) than in the rural areas (7.06%). In contrast, liquefied petroleum gas is used more in rural (7.12%) than in urban areas (1.30%).

COOKING FUEL

Wood or charcoal is used by majority (90.33%) of the households in the province for cooking. Some households use kerosene (6.45%), liquefied petroleum gas (2.31%), electricity (0.50%) and other (0.41%). Wood or charcoal users are higher in the rural (92.25%) than in the urban areas (78.19%). Households using kerosene make up 10.41 percent of the total urban households compared to 5.82 percent of the rural households. Liquefied petroleum gas is used for cooking by 10.13 percent of the urban households and only 1.07 percent of the rural households. Both urban (0.29%) and rural (0.44%) households barely use other kind of cooking fuel.

TOILET FACILITIES

As can be observed in Table 7, few households can afford to have toilet facilities. About 15.01 percent of the households have open pit type of toilet facility; 10.14 percent, water-sealed with sewer/septic tank; 8.95 percent, water-sealed with other depository; 4.43 percent, closed pit (antipolo, etc.) and 8.92 percent, other types such as pail, etc. More than half (52.55%) of the households have no toilet facilities.

Better toilet facilities are noted in the urban areas. Approximately 34.49 percent of the households have water-sealed with sewer/septic tank; 13.84 percent, water-sealed with other depository; 9.04 percent, open pit; 5.16 percent, other system and 2.48 percent, closed pit. On the other hand, less than one-half of the rural households have toilet facilities. An estimated 15.96 percent use open pit; 9.52 percent, other system; 8.17 percent, water-sealed with other depository; 6.28 percent, water-sealed with sewer/septic tank and 4.68 percent, closed pit. Households without toilet facility constitute 55.39 percent of the rural households and 34.63 percent of the urban households.

OWNERSHIP OF RADIO, TELEVISION SET AND REFRIGERATOR/FREEZER

Out of 91,939 households in Samar, 45.90 percent have radios; 1.66 percent own television sets and merely 2.15 percent possess refrigerators or freezers. About 66.28 percent of urban households own a radio compared to 42.66 percent of rural households. Households with television sets constitute 7.94 percent in the urban sector and only 0.66 percent in the rural areas. In the urban areas, 10.07 percent of the households own a refrigerator/freezer compared to only 0.90 percent of the households in the rural areas.
